

EasyRFP

For Calibration Services

How it Works

Import Your List of Test Equipment

The screenshot shows the TestUnlimited web application interface. The top navigation bar includes the TestUnlimited logo, a search bar, and user account information (DAVID S, CART). The main navigation menu includes: MENU, PRODUCTS, ACQUIRE, MAINTAIN & MANAGE, TEST & CERTIFY, ENGINEERING HELP, and a prominent orange 'GET QUOTE NOW' button.

The 'My Assets' section is active, displaying a list of assets with columns for Search Filter, Day Filter, and Status. The assets listed are:

Search Filter	Day Filter	Status
Search your assets	Days until calibration	Any s
☐ BRAND	☐ MODEL	☐ OWNER
☐ Keysight	N5183A	ddd
☐ Keysight	N5183A	
☐ AH Systems	PAM-0118P	
☐ Amplifier Research	2500A225A	
☐ Amplifier Research	250S1G6	

An 'Import Your Assets' modal is open, providing instructions and a table of CSV value formats.

Import Your Assets

The template CSV shows the required columns for importing or updating assets.

Buttons: [Template CSV](#), [Upload CSV](#)

Import CSV Value Formats

Asset ID	Insert a new asset: blank / 0 Update an asset: asset ID of an asset
Calibration Frequency	Integers only (i.e. 12, 1, 5)
Last Calibration Date	Should be a formatted date: MM/DD/YYYY or YYYY/MM/DD
Active	TRUE or FALSE
Tags	Comma separated list: Tag1, Tag2, Tag3
Other columns	Can be blank or have any value
